

# TGM2

## series

---

### Product Segments

- **Ergo Motion**

The TGM2 series gear motor is our most powerful gear motor. Although its primary use is for ergonomic applications like workplace adjustable height desks and tables, it can be used in a wide range of applications. This high torque product allows for quick, smooth and quiet adjustment of specially designed built-in spindles using external limit switches. Shafting allows mechanical synchronization of dual spindles.

#### General Features

Voltage of motor	24V DC
Maximum speed	107RPM ( $\pm 5\%$ ) after gear reduction
Torque	15.0Nm after gear reduction
Option	Hall sensor(s)
Hexogen hole for the shaft by 9mm diameter	
Low noise	

## Drawing

Standard Dimension  
(mm)

## Load and Speed

CODE	Rated Load		Typical Current at Rated Load (A)	Typical Speed	
	Torque (Nm)	Speed (RPM, ±5%)		32V DC (RPM, ±7%)	24V DC (RPM, ±5%)
Motor Speed (3800RPM)					
A	15.0	60	8.0	107	80
Motor Speed (2200RPM)					
B	11.0	34	3.5	60	45

## Terms of Use

The user is responsible for determining the suitability of TiMOTION products for a specific application.

Due to continuous development in order to improve our products, TiMOTION products are subject to frequent modifications and changes without prior notice.

TiMOTION reserves the right to discontinue the sale of any products displayed on its website or listed in its catalogue or other written materials drawn up by TiMOTION.
